## PUBLICATIONS

The Trust Fund issues annually the following:

- A **Market Report** in May. Of about 100 pages, it summarises the main features of the iron ore market in the past year; it analyses the development in iron ore consumption in relation with its demand factors: the production of pig iron, DRI, and crude steel and it provides an outlook for the iron ore market in the current and next year. It further provides information on likely changes in iron ore, pellet and DRI production capacities in individual countries.
- **“Iron Ore Statistics”** in September. This report, of about 100 pages, includes detailed data on iron ore exports by country of destination for 13 exporting countries and on iron ore imports by country of origin for 22 importing countries. It also includes more analytical data on iron ore trade, such as market shares.

## STANDING ORDER

- A **standing order** can be cancelled at any time;
- All price increases will be announced in advance;
- You will be invoiced once a year, after the dispatch of the first of the report(s), on which you have a standing order.
- A **statistical update** in November/December, with half-year data on production and trade (electronic version only).
